

## TMUX QUICK REFERENCE CARD

Frequently used TMUX commands – Version v1.0 June 2014

Prefix key is set to  $\langle ctrl-b \rangle$  by default. You can change that behaviour to e.g.  $\langle ctrl-a \rangle$  by adding the following commands to your  $\sim/.tmux.conf$ :

```
:unbind C-b
:set -g prefix C-a
:bind C-a send-prefix
```

### From Shell

```
create session
    tmux new -s session-name

kill session
    tmux kill-session -t session-name

attach session
    tmux a[ttach] -t session-name
    or tmux a #

rename session
    tmux rename-session -t old-name new-name

list session
    tmux ls
```

### Inside Tmux

$\langle M \rangle$  denotes the meta key, usually bound to  $\langle ALT \rangle$

#### Sessions

```
^b?..... show all available keybinds
^bd ^bs..... detach / reattach to session
^bs..... list all sessions
```

#### Copy Mode

vim like movements

```
h j k l..... move left/down/up/right
^b[ q..... enter / exit copy mode
 $\langle space \rangle \leftrightarrow$  ... select / copy text under cursor
^b]..... paste copied text to command line
```

### Windows or Buffers

```
^bc ^b, ..... create / rename window
^bf ^bw ..... find / list windows
^b&..... close current window
^bn ^bp ^bl.. navigate next/prev/last window
^bn..... switch to buffer 0...n
```

### Open / Switch / Resize Panes

```
^bx or ^d .... delete pane
^b!..... push all other panes to next window
^bt ^bq ..... show time / numeric values of panes
^b $\langle \leftrightarrow \rangle$  or ^bo switch to (next) pane
^b#..... show buffers
^b $\langle M - \leftrightarrow \rangle$  ^bz
    resize / full-screen pane
^b}..... swap position with next pane
^b{ or ^b^o.. swap with previous pane
```

### Split Panes

```
^b% ^b" ..... split pane vertically / horizontally
^b $\langle M-1 \rangle$  ..... vertical split, all panes same width
^b $\langle M-2 \rangle$  ..... horizontal split, all panes same height
^b $\langle M-3 \rangle$  ..... horizontal split, main pane on top, other
    panes on bottom, vertically split, all
    same width
^b $\langle M-4 \rangle$  ..... vertical split, main pane left, other panes
    right, horizontally split, all same height
^b $\langle M-5 \rangle$  ..... tile, new panes on bottom, same height
    before same width
^b $\langle space \rangle$  ..... toggle through all layouts
```
