

WEECHAT QUICK REFERENCE CARD

Frequently used WEECHAT commands – Version v0.1 August 2014

Basic Operations

`\help <cmd>` . To get help on a specific command
`\set` display all options (WeeChat and plugins)
`\set weechat.*`
display WeeChat options
`\set irc.*...` display IRC plugin options

Movements

moving around in weechat's command line is pretty much the same as in terminal (see: qrcShell)

Buffer

`<^s ^u>.....` Set unread marker on all windows
`^p ^n.....` switch buffer left, right
`<m>a.....` goto next active buffer
`<m>0...9.....` switch to buffer *n*
F9/F10..... scroll buffer title
F11/F12..... scroll nick list
`<m>w <m><...` switch windows
`<m>w <m>b...` balance windows

Commands

`/window zoom` zoom into window
`/window splith, splitv`
split window horizontally, vertically
`/join #channel`
join a channel
`/part [quit message]`
part a channel, keeping buffer open
`/query nick message`
send message to *nick*
`/close.....` close server or (private) channel buffer

Setup

Setting up authenticated FreeNode over SSL in Weechat

Search

`^r.....` incremental search
`↵, ^j, ^m...` stop search
