switch	switch to groupname

Hint-Modes

Hints are the way in which Vimperator allows you to follow links on a page. By providing each link with a suitable hint, you can access them via a set of hotkeys.

QuickHint Mode (f)

Simulates mouseselection with labeled links on web page. To run new tab in background change to uppercase F.

ExtendedHint Mode (;)

This mode is useful for performing operations on hinted elements other than the default left mouse click. If you want to yank the location of hint 24, press ;y to start this hint mode. Then press 24 to copy the hint location.

:h extended-hints

list all extended mode commands

here are a few ...

;	imitates hovering over link-object
s S	save link/object
i I	open media object (in new tab)
y Y	copy URL/label description to clipboard
