TMUX QUICK REFERENCE CARD

QRC of most often used GIT commands – Version v0.1 May 2014

From Shell

```
create session
          tmux new -s session-name
kill session
          tmux kill-session -t session-name
attach session
          tmux attach -t session-name
rename session
          tmux rename-session -t old-name new-
          name
list session
          tmux ls
```

Inside Tmux

Prefix key is set to ˆb by default. You can change that behaviour to ctrl-a by adding the following commands in your ~/.tmux.conf:

```
: unbind C-b
: set -g prefix C-a
: bind C-a send-prefix
```

Sessions

ˆb? . . . . show all available keybinds

ˆbd ˆbs . . . . . . detach / reattach to session

Copy Mode

vim like movements

h j k l . . . . . . move left/down/up/right

ˆb[q . . . . enter / exit copy mode

⟨space⟩ ↩ . . . select / copy text under cursor

ˆb] . . . . paste copied text to command line

Windows

ˆbc ˆb, ... create / rename window

ˆbn ˆbp ˆbl . . navigate next/prev/last window

Panes/Buffers

ˆb% ˆb" . . . . . . split pane vertic / horiz

ˆbx $_{or}$ ˆd . . . . delete pane

ˆbn . . . . change to buffer $0 \ldots n$

ˆb⟨m - ⇔⇕⟩ . resize pane

ˆb⟨⇔⇕⟩ ˆbz . . select / full-screen pane
