TMUX QUICK REFERENCE CARD

Frequently used TMUX commands – Version v0.2 May 2014

Prefix key is set to ˆb by default. You can change that behaviour to ctrl-a by adding the following commands in your ˜/.tmux.conf:

```
:unbind C-b
:set -g prefix C-a
:bind C-a send-prefix
```

From Shell

```
create session
            tmux new -s session-name
kill session
            tmux kill-session -t session-name
attach session
            tmux attach -t session-name
rename session
            tmux rename-session -t old-name new-
            name
list session
            tmux ls
```
