Modes

Hints are the way in which Vimperator allows you to follow links on a page. By providing each link with a suitable hint, you can access all links with a similar amount of minimal effort

QuickHint Mode (f)

Simulates mouseselection with labeled links on web page. To run new tab in background change to uppercase F.

ExtendedHint Mode (;)

This mode is useful for performing operations on hinted elements other than the default left mouse click. If you want to yank the location of hint 24, press ;y to start this hint mode. Then press 24 to copy the hint location.

`:h`elp `extended-hints`
           Open list of all extended mode commands

here are a few ...

`a A` n . . . . open link n (in new background tab)

`y Y` . . . . copy URL/label description to clipboard

`s S` . . . . save destination of a link
